

Write the MapReduce code to **compute the mean**:

Server1	Server2	Server3
( <u>South Bend</u> , STJ, 9)	( <u>Goshen</u> , ELK, 1)	( <u>Elkhart</u> , ELK, 4)
( <u>Mishawaka</u> , STJ, 4)		( <u>Granger</u> , STJ, 1)

```
public void map(val key, Record r)
```

Output:

```
===== Shuffle and sort =====
```

Input:

```
public void reduce(val c, list m1,m2,...)
```

Output:
